| Areas with a low number of women with unmet need but a high proportion of women with unmet need (may occur in areas with small populations of eligible women). |
| Low number of women with unmet need, and low proportion of women with unmet need. |

These estimates are intended to be used as a rough guide to identify areas of potential need for services. References to "providers" are to entities with one Medi-Cal provider number - i.e., billing units, not clinic sites. Estimates are not precise, especially when pertaining to regions of small population. Neither OFP nor UCSF accept responsibility for accuracy of these estimates.
